**What is the NISE Network?**
The National Informal STEM Education Network (NISE Net) is a community of informal educators and scientists dedicated to supporting learning about science, technology, engineering, and math (STEM) across the United States.

**What does NISE Net do?**
The NISE Net community works year-round to develop and disseminate educational materials and resources. Our educational experiences take the form of small exhibitions, hands-on activity kits, programs, and public forums. Our products are scientist reviewed and receive rigorous testing.

**Nisenet.org**
The nisenet.org website is an online digital library of educational products and tools designed for educators and scientists, as well as a source of professional development resources for those working in the field of informal science education.
